

PROGRESS MONITORING FORM

Activity Title: User Interface and Database Integration Laboratory

Course/Subject: Integrative Programming

Instructor: LITODANE L. LOÑEZ

Student Name/s: MACATANTAN, PRINCESS JHOANA B.

MANANGAN, ZYRON T.

SARMIENTO, ARCHIE P.

DOMDOM, JERWAYNE A.

Date Submitted: April 24, 2026

Section/Year: BSIT - WMT III-2

A. OBJECTIVES

- ☐ Create a database using MySQL
- ☐ Establish connection between GUI and database
- ☐ Perform CRUD operations (Create, Read, Update, Delete)
 - All forms shall be included such as Add New User, Edit User or any other forms that will be present in your system. All forms should be labeled according to their functions. Minimum: 7 forms
 - List down the names of the forms here:

Form Name/Label	Function
SignInForm	Authenticates users and grants access to the system by verifying their credentials against the database.
SignUpForm	Registers new user accounts and securely saves their information and hashed passwords into the database.
Dashboard	Serves as the main landing page after a successful login, providing an overview and navigation to other modules.
AddStudentForm	Collects and inserts new student records (personal, academic, and guardian information) into the database.
AddCourseForm	Collects and inserts new course

	details into the database.
CourseForm	Acts as a management page for courses and contains navigation buttons to switch between different system modules.
StudentsForm	Displays and manages the records of enrolled students

- ☐ Design a functional GUI interface
- ☐ Apply proper coding practices such as validations
 - Add further validations in the CRUD operators most specifically on the part of Delete and Update.
 - Dialog boxes is highly recommended.

☐ Deadline of Submission will be on **May 04, 2026**. Face to Face presentation

B. TASK PROGRESS CHECKLIST

(Kindly check your accomplishments for each day. Check only the tasks you have completed, then upload this to MS Teams.)

Task Description	Status (✓/X)	Remarks
Database created in phpMyAdmin	✓	Created the local db_sis database using Laragon/MySQL.
Table structure defined correctly	✓	Defined tables for Students, Courses, Departments, YearLevels, and Users with appropriate primary keys and data types.
Connection established (MySQL Connection)	✓	Successfully configured MySqlConnection to connect the C# WinForms application to the local server.
Insert (Create) function implemented	✓	Implemented parameterized INSERT queries for the Add Student, Add Course, and Sign Up forms (including SHA256 password hashing).
Retrieve (Read) data displayed in GUI		
Update function working		
Delete function working		
GUI design completed		
Error handling	✓	Added field validation,

implemented		password matching checks, duplicate entry prevention, and try-catch blocks for MySqlConnection.
Program runs without errors	✓	Resolved event wiring issues and cleared build errors for smooth execution.

C. STUDENT REFLECTION

(What did you learn? Challenges encountered? Per Student)

Student 1: Zyron T. Manangan

Setting up the database in phpMyAdmin taught me the importance of a well-organized table structure. The main challenge was ensuring all data types were correctly defined to prevent future errors.

Student 2: Princess Jhoana B. Macatantan

I learned that a solid back-end foundation is essential for building a functional Information Management system. Planning the table structure required careful attention to detail to ensure data integrity.

Student 3: Archie P. Sarmiento

Still in the early stages and figuring things out. The database connection and CRUD operations are what I'm looking forward to tackling, though I know those will be my biggest challenge. For now, just trying to get a solid understanding of the requirements before getting into the actual coding.

Student 4: Jerwayne A. Domdom

I'm just starting and learning how things work. I want to learn how to connect to a database and save or change information, but I know that will be the hardest part. Right now, I'm just trying to understand what I need to do before I start writing the code.

D. SCREENSHOTS

(Check the tasks you completed each day. Take screenshots as proof of your work.)

Figure 1: Creation of the local database db_sis for the Student Information System.

Figure 2: Successful establishment of the MySQL database connection within the C# application.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
☐	1 StudentID	int			No	None		AUTO_INCREMENT	Change Drop More
☐	2 FirstName	varchar(50)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	3 LastName	varchar(50)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	4 MiddleName	varchar(50)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
☐	5 Suffix	varchar(10)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
☐	6 BirthDate	date			No	None			Change Drop More
☐	7 Gender	varchar(10)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	8 Email	varchar(100)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	9 PhoneNumber	varchar(20)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	10 Address	varchar(255)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	11 YearLevel	varchar(20)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	12 Department	varchar(100)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	13 GuardianName	varchar(100)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	14 GuardianRelationship	varchar(50)	utf8mb4_0900_ai_ci		No	None			Change Drop More
☐	15 GuardianEmail	varchar(100)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
☐	16 GuardianPhone	varchar(20)	utf8mb4_0900_ai_ci		No	None			Change Drop More

Figure 3: Database table structure and naming conventions for the Students table.

The screenshot shows a web application window titled "Account Creation". On the left is a dark blue sidebar with the Pangasinan State University logo and the text "Pangasinan State University Student Information System". The main content area is titled "Create an Account" and contains a registration form. The form has fields for "First Name" (filled with "Zyron"), "Last Name" (filled with "Manangan"), "Middle Name (optional)" (empty), "Suffix (optional)" (filled with "Jr, Sr, III"), "Password" (filled with "zeiii123"), and "Confirm Password" (filled with "zeiii123"). There are "Cancel" and "Create Account" buttons at the bottom. A modal dialog box titled "Success" is overlaid on the form, displaying a blue information icon and the text "Registration Successful!". The dialog has an "OK" button.

Figure 5: Successful execution of the Insert (Create) function during a new user registration.

Figure 6: Proof of the implemented Create functionality, showing the newly registered user successfully inserted into the users table.

The screenshot shows the 'Student Registration' form. On the left is a dark blue sidebar with the Pangasinan State University logo and the text 'Pangasinan State University Student Information System'. The form is titled 'Student Registration' and has sections for 'Personal Information', 'Academic Information', and 'Guardian Information'. A 'Success' dialog box is overlaid on the form, displaying the message 'Student successfully added!' with an 'OK' button.

Personal Information

First Name *
Zyron

Last Name *
Manangan

Middle Name (optional)
Tejada

Suffix (optional)
Dela Cruz

Birth Date *
Tuesday, September 20, 2005

Gender *
☒ Male ☐ Female
