PROFILE

Aspiring Software Developer with a robust background in web and desktop architectures. Proficient in Laravel, Tailwind CSS, and C#, with a proven ability to design scalable systems—including document routing and student management platforms. A meticulous coder who values clean, user-centric design and efficient database schemas. Committed to writing maintainable, high-performance code that solves real-world challenges.

EDUCATION

Bachelor Degree Of Information Technology

Pangasinan State University | 2023 – 2027

GWA: 1.59

WORK EXPERIENCE

Full-Stack Web Developer

Pangasinan Provincial Capitol | 2024 – 2026

- **Architected & Developed** the Pangasinan Legislative Information System (PangasinanLIS), a mission-critical web application using Laravel (PHP) and Tailwind CSS, delivering a scalable and responsive solution for document routing.
- **Engineered** complex backend logic and secure database schemas, integrating dynamic form handling to streamline legislative workflows.
- **Designed** a modern, minimalist user interface that ensures high accessibility and ease of use for provincial office staff, significantly reducing manual processing time.
- **Collaborated** with government stakeholders under a formal MOA to define technical requirements, conduct end-to-end testing, and ensure the deployment of a reliable, high-performance web platform.
